

Reportée SmartCover™

Amplify the functionality of Castelle Network Fax Servers, document applications and partner products:

- FaxPress™ and FaxPress Premier™
- Server based scanning and routing software
- Multifunction device partners
- Workflow partners
- Document management partners

Reportée's **patent-pending** software increases the use and sale of Castelle products by connecting document processing hardware to business information software.

Reportée complements Castelle's strategy of "providing a unified fax and email environment" for Business and Enterprise.

Reportée has the highest accuracy rate – 99%, the lowest total cost of ownership, and requires no APIs or import/export

Why Reportée?

- Uniquely designed for automatic processing of faxed forms, often irregularly compressed or skewed
- Uniquely designed for automatic processing of emails and attachments
- Extends the functionality of existing Network Fax Servers and scan based products; leverages existing Castelle equipment to increase Castelle customers' ROI

Castelle

Network Fax Servers

- **Routing instructions based on destinations**
DID, ISDN, T.30 sub-addressing, DTMF, line group routing or manual routing to the desktop
- **Processing of Inbound and outbound faxes**
- **Additions – Manual/known users**
Manually created as recipient address are changed or added
- **Delivery – One to One, Many to One**
One set of routing instructions for each recipient. Example: Invoices routed to different Accounts Payable clerks based on DID
- **Image Routing**

Reportée Adds

- **Processing instructions based on data fields**
Automatically generated after creation of a template with the SmartCover wizard
- **Automatic processing of Inbound faxes/emails and scans**
- **Additions – Automatic/real time**
Automatically generated as sender data is changed or added, whether by user interface through web based applications or by the client
- **Delivery – One to Many**
One SmartCover template can use many different routes within a process. Example: Invoices routed to different Accounts Payable clerks based on account data
- **Data Routing, File Renaming, TIFF/PDF Separating**

Reportée SmartCover™

Reportée combines its **patent-pending** form and capture technologies to digitally deliver hard copy documents that circulate outside the network to workflow inside the enterprise.

Configurable rules are used to define automatic handling, messaging and routing of documents.
