

Network Fax Servers

FaxPress™, FaxPress Premier™, FaxPress Enterprise™

Incorporate Castelle Faxing into eCopy ShareScan OP

FaxPress, FaxPress Premier and FaxPress Enterprise network fax servers are a complete hardware and software solution designed to provide unlimited users the ability to send and receive faxes directly from applications, various email environments and over the internet. FaxPress/FaxPress Premier/FaxPress Enterprise saves time for the user by eliminating a multi-step, multi-location process of sending and receiving faxes. Now the user is able to send, receive, view, annotate, and forward a fax instantaneously from their desktop, freeing up time for more productive work. Other key benefits include increased security of inbound faxes, improved logging of fax delivery, enhanced accounting of fax usage and higher quality of outbound documents.

Castelle's FaxPress/FaxPress Premier/FaxPress Enterprise tightly integrates with the eCopy ShareScan OP product to offer users convenient access to network capabilities directly from compatible copier devices. Users can scan and fax documents directly from the copier control panel. Utilizing an easy to use touch screen, the user can specify recipient information or select recipients from a variety of FaxPress/FaxPress Premier ODBC phonebooks. Users can also select corporate or personal cover pages directly from the copier. With a click of a button, the document is scanned and sent to the FaxPress/FaxPress Premier/FaxPress Enterprise to be faxed out.

An administrator console allows the system administrator to configure whether users should be authenticated and use their own accounts in order to use their own personal faxing preferences as well as enforce billing and tracking options.

The FaxPress/FaxPress Premier/FaxPress Enterprise eCopy ShareScan OP connector offers the rich desktop faxing capabilities that FaxPress and FaxPress Premier offers directly from a centralized network copier to fax hard copy documents.

eCopy Highlights

eCopy ShareScan OP sets a new competitive standard for simple, secure and cost effective electronic distribution and integration of paper documents.

Integrate with Existing Enterprise Applications Capture paper information for easy electronic retrieval

Send Electronically and Securely Fulfill security and compliance requirements. Password authentication option available at the device

Dynamic User Interface Reflects unique user permission and preferences at the copier

Alter Document Properties at Device Change file format, select document encryption and create searchable text at the unit

Manage eCopy-enabled Devices from One Central Location

Departmental Needs Configure devices with unique requirements for each workgroup

CASTELLE®

Castelle Network Fax Servers

FaxPress™

- 1 to 8 analog lines
- Ethernet 10/100Base-T
- FaxPress client/server software
- Email gateways included

FaxPress:	Part Numbers
FP 2500 1-line	66298601-286
FP 2500 2-line	66298601-094
FP 5000 4-line	66298601-048
FP 5000 8-line	66298601-047

FaxPress Premier™

- 4 to 16 analog lines
- Ethernet 10/100Base-T
- FaxPress Plus client/server software
- Email gateways embedded
- Internal disk drive
- Secure web browser interface*

FaxPress Premier:	Part Numbers
FPP Analog 4-line	66298601-241
FPP Analog 8-line	66298601-197
FPP Analog 12-line	66298601-209
FPP Analog 16-line	66298601-210

FaxPress Enterprise™

- Digital T1 support
- Ethernet 10/100Base-T
- FaxPress Plus client/server software
- Email gateways embedded
- Internal disk drive
- Secure web browser interface*

FaxPress Enterprise:	Part Numbers
FPE Fractional T1 8-channel	66298601-294
FP Enterprise T1 24-channel	66298601-295
FP Enterprise T1 48-channel	66298601-296
FP Enterprise T1 72-channel	66298601-297

FaxPress Enterprise Redundant™

- Digital T1 support
- Dual power supplies
- Dual fans
- Dual disk drives
- RAID controller for disk mirroring
- Redundant Ethernet 100/1 GB
- FaxPress Plus client/server software
- Secure web browser interface*
- Configurable for dual fax modems and automatic failover

FP Enterprise Redundant:	Part Numbers
FPE Redundant Fractional T1	66298601-313
FPE Redundant Dual Frac. T1	66298601-314
FPE Redundant T1 24-channel	66298601-315
FPE Redundant T1 48-channel	66298601-316
FPE Redundant T1 72-channel	66298601-317

* Web interface tested for full interoperability with MS Windows, Linux, MacOS, and standard Unix web browsers.
