

# ERM Xtender 5

## LEGATO solutions

Each day, organizations produce hundreds of thousands of pages of computer-generated reports, such as statements, bills, invoices, policies, contracts and other internal reports. In the past, these reports were produced on paper, routed around the organization or mailed to the customer and stored on microfiche, microfilm or the paper itself. Today's information-centric economy produces reports on high volume, all-points addressable printers, using printstream technology that includes extensive formatting instructions. Enterprise reports need to be available electronically and accessible on a 24x7 basis from anywhere in the world.

## Enterprise Report Management for Application Xtender 5

ERM Xtender® (ERMx) provides report processing for advanced printstreams, as well as traditional COLD text formats, for management within Application Xtender® 5 (AX). By providing fast and efficient capture of enterprise report data, ERMx turns enterprise reports into e-reports, enabling internal and external report delivery and providing a significant return on investment.

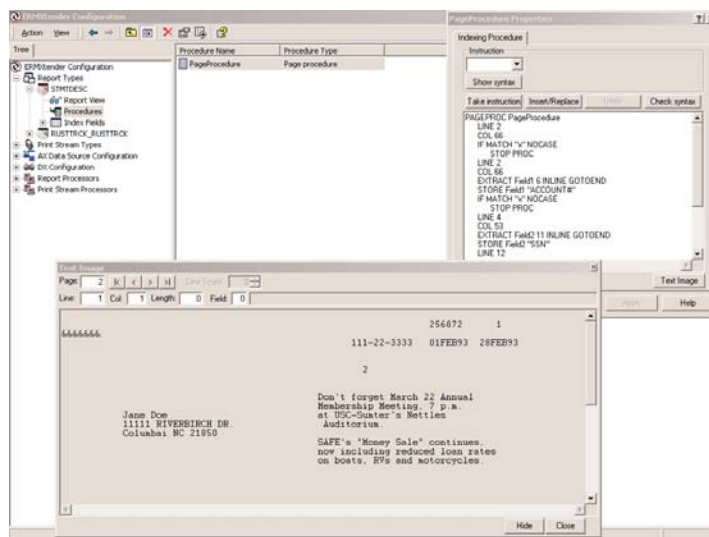

### Collect and Process

- Direct support for IBM AFP, Xerox Metacode and HP PCL printstreams, Adobe PDF, as well as ASCII and EBCDIC(K) text formats
- Maintains the format of printstream reports including fonts, boxes, logos and other graphics, as well as interpreting dynamic formatting, to ensure exact electronic reproduction in industry standard PDF format
- Forms-overlay capability enables enhanced presentation for text-based reports
- Provides intelligent, automatic parsing and indexing of reports including mixed report types, with a powerful, easy-touse data extraction tool

- Supports multiple indexing rules for basic and complex report processing Integration for Delivery
- Releases reports automatically for management and viewing within AX 5 and Web Xtender™ (WX) browser client module
- Customer service representatives see report information in the same way as customers, improving response to customer inquiries
- Reports can be viewed on workstations, over the Web or transmitted electronically via email

### Automatic and Scalable

- Process reports automatically in the background, facilitating immediate availability
- Powerful tools to audit system use and performance, including job status information and confirmation of job completion
- Integration with Disk Xtender® (DX) ensures long-term availability and retention of report information, using whatever media best meets enterprise requirements - Optical, WORM, Tape, DVD or CD

- Integration with Workflow Xtender® (WFX) triggers business processes during report processing
- By processing, indexing and archiving enterprise reports for online retrieval, ERMx allows organizations to reduce the cost and improve the productivity of multiple business

**ERMx turns enterprise reports into e-reports, enabling internal and external report delivery and providing a significant return on investment.**

processes. It improves access to information while reducing or eliminating costs associated with paper, film and fiche. ERMxTender is an integral part of LEGATO's ApplicationXtender family of content management solutions.

### **Specifications:**

#### **Server Requirements**

- Pentium 300 MHz or higher
- Available hard disk space for Printstream Processor - 5x the largest report to process
- Available hard disk space for Text Report Processor - 1.5x the largest report to process
- 128MB RAM
- Microsoft Windows NT or Windows 2000
- LEGATO ApplicationXtender 5 or WebXtender

#### **Print and Fax support**

- Local Printer
- Network Print Server
- Local Fax hardware and software
- Castelle Fax Press

#### **Viewer Support**

- LEGATO's ApplicationXtender 5
- LEGATO's WebXtender
- Adobe Acrobat Viewer
- Image and ASCII form overlay

#### **Supported Formats**

- ASCII
- EBCDIC(K)
- IBM AFP
- Xerox Metacode
- HP PCL
- Adobe PDF

#### **Database Support (via ApplicationXtender)**

- Microsoft OLE DB providers
- ODBC compliant database
- Oracle
- Microsoft SQL Server

#### **Storage Support (via ApplicationXtender)**

- LEGATO's DiskXtender (Optical, WORM, Tape, DVD-RAM, CDRom)
- LEGATO ArchiveXtender Ascent Storage Edition
- Network File Server
- Local or shared network hard drive
