

Castelle Network Fax Servers

FaxPress™, FaxPress Premier™, FaxPress Enterprise™

Scan-to-Fax with HP Digital Senders and Multifunction Printers

Quickly scan-in documents using HP's Digital Senders or Multi-function Printers and fax-out documents using Castelle's FaxPress Network Fax Server

Castelle and HP have teamed up to bring network users a complete scan and fax solution. Bringing HP digital senders and MFP's together with the Castelle's FaxPress, FaxPress Premier and FaxPress Enterprise network fax servers, users can simply scan in hardcopy documents using an HP digital sender or MFP. Attach scanned documents in native format to the fax and the Castelle fax server will automatically convert to fax format. By joining these two technologies, fax machines are virtually eliminated

along with some of the problems typically characterized by the fax machine, such as relatively low quality transmissions, slow software scanning speed, paper jams, low data transmission rates and the inability to send and receive faxes simultaneously. Both products attach directly to NetWare or Windows NT LANs via Ethernet connections.

Features & Benefits

Castelle offers a complete hardware and software solution that integrates with HP Digital Senders and MFPs

Flexible Supports most workgroup environments

Scalable Automatic load balancing allows additional FaxPress units to be added to the network at any time

Complete Hardware and Software Solution connects directly to the network

Easy Installation FaxPress can be installed in less than 15 minutes because it does not require adding new hardware or reconfiguring your server

State-of-the-art FaxPress allows incoming faxes to be delivered directly to the intended recipient using auto-routing (DID or DTMF), secured manual routing, and industry-standard T.30 sub-addressing

Cost-effective Castelle fax servers have one of the shortest ROI cycles saving money on telephone lines, lost productivity, consumable and cost of maintenance and administration.

Internet Faxing Castelle's FaxPress online module web client software, allows mobile LAN users to easily access their fax messages and respond to them through a local telephone line.

The combined Castelle/HP product offering changes the usage model for a network user sending paper faxes. The integration at a software and network level, along with the addition of a display and alpha-numeric keypad allows the network user three scan/fax options:

1. Go to the scanner, enter a phone number and "send" the fax
2. Go to the scanner, select a phone number from a predefined fax destination list and "send" the fax
3. Scan a document, return to the desktop and utilize the Castelle user interface to send or attach the paper document to an electronic document for transmission

FaxPress, FaxPress Premier and FaxPress Enterprise also allow faxing from HP AutoStore and from the Email feature of the Digital Sender or MFP.

Castelle network fax servers are a complete hardware and software solution designed to provide unlimited users the ability to send and receive faxes directly from applications, various email environments and over the internet. FaxPress fax servers save time for the user by eliminating a multi-step, multi-location process of sending and receiving faxes. Now the user is able to send, receive, view, annotate, and forward a fax instantaneously from their desktop, freeing up time for more productive work. Other key benefits include increased security of inbound faxes, improved logging of fax delivery, enhanced accounting of fax usage and higher quality of outbound documents.

Castelle Network Fax Servers

FaxPress™

FaxPress:	Part Numbers	Hardware	Email Gateways	Web Interface
FP 2500 1-line	66298601-286	Desktop	Included	Not Available
FP 2500 2-line	66298601-094	Desktop	Included	Not Available
FP 5000 4-line	66298601-048	Desktop	Included	Not Available
FP 5000 8-line	66298601-047	Desktop	Included	Not Available

FaxPress Premier™

FaxPress Premier:	Part Numbers	Hardware	Email Gateways	Web Interface
FPP Analog 4-line	66298601-241	Rack mount	Embedded	Included*
FPP Analog 8-line	66298601-197	Rack mount	Embedded	Included*
FPP Analog 12-line	66298601-209	Rack mount	Embedded	Included*
FPP Analog 16-line	66298601-210	Rack mount	Embedded	Included*

FaxPress Enterprise™

FaxPress Enterprise:	Part Numbers	Hardware	Email Gateways	Web Interface
FPE Fractional T1 8-channel	66298601-294	Rack mount	Embedded	Included*
FP Enterprise T1 24-channel	66298601-295	Rack mount	Embedded	Included*
FP Enterprise T1 48-channel	66298601-296	Rack mount	Embedded	Included*
FP Enterprise T1 72-channel	66298601-297	Rack mount	Embedded	Included*

FaxPress Enterprise Redundant™

FP Enterprise Redundant:	Part Numbers	Hardware	Email Gateways	Web Interface
FPE Redundant Fractional T1	66298601-313	Rack mount	Embedded	Included*
FPE Redundant Dual Frac. T1	66298601-314	Rack mount	Embedded	Included*
FPE Redundant T1 24-channel	66298601-315	Rack mount	Embedded	Included*
FPE Redundant T1 48-channel	66298601-316	Rack mount	Embedded	Included*
FPE Redundant T1 72-channel	66298601-317	Rack mount	Embedded	Included*

* = Web interface tested for full interoperability with MS Windows, Linux, MacOS, and standard Unix web browsers.
