

FaxPress Enterprise™ Redundant

Network Fax Servers for Business-Critical Faxing

An All-in-One Redundant Fax Solution for T1, E1, and ISDN Environments

FaxPress Enterprise Redundant is the newest addition to Castelle's FaxPress Enterprise family of digital fax servers, providing an all-in-one redundant fax solution for T1, E1 or ISDN environments. Duplicated and backup hardware components provide increased reliability for business-critical faxing. Its server-class hardware closely monitors the system, sending notification to the administrator in the event of a failure. Features providing improved availability include:

- Dual hot swappable hard disk drives
- RAID technology for disk mirroring
- Dual hot swappable power supplies
- Dual hot swappable cooling fans
- Dual Gigabit Ethernet connectivity with client cross over support
- Industrial grade hardware
- Support for Digital T1, E1 and ISDN Environments in single or dual configurations for auto failover

Redundant Hardware Components

The redundant components of FaxPress Enterprise Redundant address and eliminate common points of potential failure. The FaxPress Enterprise Redundant server hardware is built around an Intel-based mother board with 1GB of memory, 2MB cache, and dual 100/1GB NIC connections. It includes a RAID 1 controller, two serial 80GB disk drives, two removable power supplies and fans.

Castelle Network Fax Servers

Automatic Failover

The FaxPress Enterprise can also be configured for single or multiple digital connections to allow for automatic failover if the connection to the service provider is lost.

FaxPress Enterprise runs on Castelle's FaxPress Plus™ software for sending and receiving faxes using the Castelle client, email, production applications, or via the internet using Castelle's Web Client.

T1, E1 and ISDN Configurations

The FaxPress Enterprise Redundant T1 can be installed with a fractional T1 board to provide 8 channels across a fractional T1 line, dual fractional T1 boards, or one to three T1 fax boards to support from 24 to 72 channels across a T1 line(s).

For international markets, FaxPress Enterprise Redundant is available in an E1 configuration with support for fractional E1, dual fractional E1, or full E1 up to 90 channels, and ISDN configurations from 2 to 24 channels per server. Upgrade kits allow customers to tailor the FaxPress Enterprise Redundant to their needs as the organization grows.

If You Can Print It, You Can Fax It

Castelle network fax servers offer every possible network faxing option, including:

- Desktop faxing
- Automated, production faxing
- Faxing directly from email applications
- Faxing directly from Microsoft Office
- Sending faxes to multiple email and fax recipients
- Document management system and electronic workflow integration
- Faxing from copiers, scanners and MFP touch screens
- Multilanguage character support
- Leading-edge development tools for custom fax applications

Castelle's family of network fax servers give users a versatile fax management solution that runs in Microsoft Windows, Novell NetWare, Macintosh and Linux environments.
