

Title Using FaxPress with GoldMine

Summary FaxPress only supports faxing through GoldMine by installing and using FaxPress' GoldMine Integration Add On Component.

Discussion GoldMine users who want to send faxes using FaxPress must install FaxPress GoldMine Integration Support. Once installed, the **Fax via FaxPress...** command will be added in the File menu in GoldMine.

This method supports the updating of GoldMine's history transaction logs. At this time, FaxPress does not support the GoldMine fax option using Microsoft Word or Microsoft Word templates or the **Write/Fax To Contact...** command under the Contact menu in GoldMine.

Use the **Fax via FaxPress...** command when using FaxPress with GoldMine Application. This command will bring up the FaxPress Compose Fax window with the contact name, company, and fax number automatically filled in.
